

Geometric Sunglasses

Photo courtesy of: <https://www.buzzfeed.com/pippa/diy-sunglasses-5ocb>

Supplies Needed:

- Sunglasses (you can pick up a pair from the library or use your own!)
- Colored Nail Polish or Washi Tape (also available from the library)
- If using nail polish, you may want something smaller to apply the polish for more detailed designs – craft stick, toothpick, etc. Otherwise, the nail polish brush will work, too!
- Clear Nail Polish for a top coat (optional)

Instructions:

1. Choose your sunglasses! You can use a pair you already have at home, or choose one of these colors from the library:

2. Choose your nail polish or washi tape! You can use your own, or you can request a basic nail polish color or choose one of these rolls of washi tape from the library:

3. Decorate your sunglasses with the colored nail polish and let dry, or decorate with the washi tape! If you are using nail polish, you may want to apply a clear coat of nail polish on top, just to protect your designs! Then, get out in the sun and enjoy your new shades!!
