

Puffy Paint Window Clings

Instructions & photos provided by: <http://bit.ly/puffyclings>

Supplies Needed:

- Puffy Paint
- Wax Paper
- Templates

Instructions:

- 1.) Place waxed paper over the templates you want to trace. The ornaments were left blank so you can make your own designs on them. Just make sure that all of your lines connect and touch each other.
- 2.) Squeeze a thick layer of puffy paint on top of the wax paper, following the lines of your template. Then, let the clings dry overnight.

- 3.) The trickiest part is peeling the clings off of the wax paper. After drying overnight, peel them away very carefully and slowly. Thicker lines will peel off easier, and thin lines may tear or not hold their shape.
- 4.) Decorate your windows with your finished designs! You can use the warmth of your hand to secure them onto the glass.
