

Instructions & photos provided by: <https://lively.com/diy-phone-holder/>

Supplies Needed:

- Toilet Paper Roll
- Washi Tape
- 4 Push Pins
- Marker
- Scissors

Instructions:

- 1.) Place your phone on top of the toilet paper roll and trace around it with your marker. This will be the slit your phone will sit in when completed.

- 2.) Use your scissors to cut the slit out of the roll
- 3.) Using your washi tape, tape all around the roll covering the slit as well. Feel free to use different colors, or any type of fabric/cloth/paper to make it a pretty design. You will just need to glue on those items, of course!
- 4.) Cut the tape covering the slit and push excess tape inside the roll so it's not sticking to your phone
- 5.) Push your 4 pins into the bottom of the roll as they will be the "legs" that hold it sturdy. Be sure they are on the outer edge of the roll so that they don't come close to your phone when in place and scratch it. Then enjoy!
